Position: QA Engineer

Founded by Vibhav Nuwal & Vishal Pandya, the company has grown from 2 members in 2010 to over 120 team members spread across India and internationally. The company started with Renewable Energy Services as its foundational business through trading of Renewable Energy Certificates and quickly expanded to providing technology based solutions for electricity grid and renewable energy management. It achieved a major milestone in establishing Renewable Energy Management Centers across 11 control centers in India. The company has since expanded to providing a host of technology driven solutions to stakeholders across multiple sectors.

Job Profile:

- Review requirements, specifications and technical design documents to provide timely and meaningful feedback
- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities
- Design, develop and execute automation scripts using open source tools
- Identify, record, document thoroughly and track bugs
- Perform thorough regression testing when bugs are resolved
- Develop and apply testing processes for new and existing products to meet client needs
- Liaise with internal teams (e.g. developers and product managers) to identify system requirements
- Monitor debugging process results
- Investigate the causes of non-conforming software and train users to implement solutions
- Track quality assurance metrics, like defect densities and open defect counts
- Stay up-to-date with new testing tools and test strategies

Expected Skill Set:

- BE/B. Tech/M. Tech in computer science or MCA
- Certified application tester.
- Knowledge of Selenium and Jmeter is a mandate
- Programming knowledge (This depends on whether a Black Box or a White Box testing methodology is used.)
- Experience working in an Agile/Scrum development process
- Teamwork
- Script writing
- Good communication
- Documentation
