Position: Software Engineer - Java

Founded by Vibhav Nuwal & Vishal Pandya, the company has grown from 2 members in 2010 to over 160 team members spread across India and internationally. The company started with Renewable Energy Services as it's foundational business through trading of Renewable Energy Certificates and quickly expanded to providing technology based solutions for electricity grid and renewable energy management. It achieved a major milestone in establishing Renewable Energy Management Centers across 11 control centers in India. The company has since expanded to providing a host of technology driven solutions to stakeholders across multiple sectors.

Job Profile:

We are looking for skilled professionals with experience in building web applications in Java. The job requires to compile technical documentation and user assistance material, requiring excellent communication skills. You will work as part of a software development team and be responsible for designing, implementing and maintaining Java applications.

Developers are responsible for analysing user requirements and business objectives, determining application features and functionalities, and recommending changes to existing Java-based applications among other duties.

- Contribute in all phases of the development lifecycle.
- Analyze user requirements to determine how to translate into Java.
- Aligning application design with business goals.
- Debug and resolve technical issues that arise during the development or after deployment at various stages.
- Test to ensure designs are in compliance with specifications.
- Continually engage in professional development.
- Develop documentation to track and assist users.
- Producing detailed design documentation.
- Make recommendations to existing job infrastructure.

Expected Skill Set:

- 3-5 yrs experience in Java frameworks like Spring, Hibernate, SpringBoot, etc.
- Experience in MVC pattern, MySQL database, Tomcat, Git, and Jira.
- Relevant experience in thymeleaf, JSP, and other front-end technologies.
- Analytical mindset and good problem-solving skills.

Experience: 3-5 Years

Location: Bangalore
